

# ***Catalyst Foundation Call for Proposals***

## **Supplemental Funding 2023**

**The Catalyst Foundation invites proposals for:**

**Supplemental Funding** of **Cross-Disciplinary Research Projects in which at least one discipline is related to analog/digital integrated circuit design and analysis.**

**Purpose:**

To provide supplemental funding for an existing, on-going research project that fulfills the mission of the Catalyst Foundation. The on-going project must have existing funding sources from reputable funding agencies such as NSF, DoD, etc.

**Grant Amount:**

\$20,000 per year non-renewable

**Who is eligible to apply?**

Principal investigators (PIs) through the grant office of their universities.

**Duration:**

12 month period

**Acceptable use of Catalyst Funds:**

- Student Travel
- Fabrication Costs
- Student Support (their stipend or salary)
- Measurement Equipment
- Professor's Travel

This funding should not be used for faculty offset or salary items.

**Proposal Due Date:**

February 13, 2023

**Target Date for the Notification of Acceptance:**

February 28, 2023

**Proposal Format:**

The abstract of project (1 to 2 pages) must be submitted with the original proposal of on-going project. The proposal can be free format but must include

- Status of project
- Cross-disciplinary statement to meet the Foundation's mission
- Intended use of funds
- Name(s) of organization(s) currently funding project, with the original proposal must be attached.

**Submission requirements:**

Electronic submission of proposal is required. File format should be PDF, Post-Script, or Microsoft Word. Submit proposals by email to [submit@catalyst-foundation.org](mailto:submit@catalyst-foundation.org). Please also include electronic fund transfer information if possible.

**Additional Information:**

Please refer to the Catalyst Foundation website, <http://www.catalyst-foundation.org> for insight into the types of projects that have received funding from the Catalyst Foundation previously.
